PROFESSIONAL SUMMARY

Computer Engineer graduated from the Federal University of São Carlos (UFSCar), with experience in full-stack web development, data engineering and analytics, and applied artificial intelligence. I have worked on building web interfaces and platforms, cloud data integration and automation pipelines, data analysis for strategic insights, metrics and conversion tracking, and AI agents for customer support. I have hands-on experience across the whole development cycle, from design to production delivery, with a focus on clean code, best practices, teamwork and the responsible use of AI tools to boost productivity. Advanced English.

PROFESSIONAL EXPERIENCE

Intern - Data Engineer and Full-stack Developer - Deep Metrics

09/2025 – 06/2026

- Mapped the full user journey, from first visit to conversion, using Python and Google BigQuery to process data and generate strategic marketing insights;
- Built an internal platform in React + TypeScript (Next.js) to replace static dashboards with a dynamic interface, integrating the front-end with data services through APIs;
- Built 10 production integration pipelines (Cloud Run) consuming REST APIs from multiple platforms (Meta Ads, Google Ads, GA4, HubSpot, RD Station, among others) to centralize data, and handled asynchronous requests via webhooks for real-time data;
- Built the front-end of company websites with Astro, focused on performance and responsive layout;
- Implemented event tracking with Google Analytics (GA4) and Google Tag Manager on websites, capturing conversions and user interactions and sending the signals in parallel to GA4, Meta Ads, Google Ads and Microsoft Ads;
- Developed customer support AI agents using LangChain;
- Used AI-assisted development (Claude Code) to speed up feature delivery and maintain code standards, always with proper review.

Front-end Developer - BipGroup (UFSCar)

03/2024 – 09/2025 | FAPESP Scholarship — Technical Training in Web Development

- Built 30+ screens in React + TypeScript with Next.js (from Figma prototypes), with HTML, CSS and a responsive, accessible layout, covering two access profiles (regular user and administrator), a landing page and authentication and sign-up pages;
- Created the platform's Design System;
- Developed reusable React components, prioritizing simple, clean and readable code;
- Integrated the front-end with the backend REST APIs to send and receive data;
- Implemented sign-up, login and user session;
- Versioned the work with Git, keeping deliverables standardized and high quality;
- Documented React components with Storybook.

ADDITIONAL INFORMATION

- **Undergraduate thesis — "A Study of Code Generation via JS-Distributor for an Authentication and Authorization System"** (completed · advisor: Prof. Daniel Lucredio, UFSCar). Automatic generation of authentication and authorization mechanisms (Keycloak, RBAC) for migrating a monolithic architecture to **microservices (distributed systems)**, focused on security context propagation and service-to-service communication in distributed systems.
- **Teaching assistant** for the course **Introduction to Algorithmic Thinking (UFSCar).**

EDUCATION

Computer Engineering - Federal University of São Carlos (UFSCar)

- Bachelor's degree - 08/2021 to 07/2026

Air Force Cadet Preparatory Course and High School - Air Force Cadet Preparatory School (EPCAR)

- Duration: 01/2017 to 12/2019

SKILLS

Category	Skills
Front-end	TypeScript, JavaScript, React.js, HTML5, CSS3, Next.js, Flutter, Responsive Design / Mobile First, Figma, Componentization, Storybook
Back-end & Data	Python, SQL, REST APIs, ETL Pipelines (n8n, Google Cloud Run), Authentication and Authorization
Office tools	Microsoft Word, Excel and PowerPoint, Canva
AI Agents	Function/tool calling, RAG, LangChain/LangGraph
Testing	Jest
Version control	GitHub
Analytics	Google Analytics (GA4), Google Tag Manager
AI-assisted development	Claude Code
Cloud & Infra	GCP (Cloud Run, BigQuery), Docker, Terraform
Languages	Portuguese (native), English (advanced)
Practices & architecture	Clean Architecture, SOLID, Agile methodologies
